

RUTUJA KALE

React.js Developer | Full Stack Engineer | MERN Stack

rutujakale2112@gmail.com | +91 78410 95520 | linkedin.com/in/rutuja-kale-385686218 | github.com/RutuKale

PROFESSIONAL SUMMARY

Results-driven **React.js & MERN Stack Developer** with 1+ year of professional enterprise experience alongside active freelance full-stack development. Strong analytical foundation with expertise in translating complex business requirements into optimized, reusable component architectures. Adept at leveraging **TypeScript**, modern state management (**Redux Toolkit**), and algorithmic optimizations to minimize rendering overhead, design robust databases, and securely integrate RESTful APIs within Agile workflows.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, Data Structures & Algorithms (DSA), OOP
Frontend:	React.js, Redux Toolkit, Context API, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI
Backend:	Node.js, Express.js, RESTful APIs, Google OAuth Authentication
Databases:	MongoDB, PostgreSQL
Tools & Ecosystem:	Git, GitHub, Postman, VS Code, Vite, Live Deployment (Vercel/Render)
Methodologies:	Agile/Scrum, SDLC, Performance Optimization

PROFESSIONAL EXPERIENCE

Independent Full-Stack Developer | Freelance

Jan 2026 – Present

- Designing and deploying end-to-end web applications for clients, migrating legacy JavaScript codebases to **TypeScript** to achieve compile-time type safety and reduce production bugs by **20%**.
- Architecting scalable database schemas in MongoDB and writing optimized backend REST APIs using Node.js and Express to handle concurrent user requests smoothly.
- Creating modular, pixel-perfect user interfaces using Tailwind CSS and React.js, ensuring complete cross-browser compatibility and responsive mobile-first views.
- Managing complete product lifecycles independently—from gathering client requirements and structuring codebases to setting up continuous deployment via GitHub and Vercel.

Software Engineer

Jan 2025 – Dec 2025

Logicloom IT Solutions

- Built responsive, reusable React.js UI components following modular, component-driven design patterns, accelerating frontend team development efficiency by **25%**.
- Architected centralized application state using **Redux Toolkit**, ensuring predictable data flows across multi-step user workflows.
- Integrated RESTful APIs with structured error handling and input validation, reducing runtime errors and improving application reliability.
- Optimized React rendering performance by eliminating unnecessary re-renders using `useMemo`, `useCallback`, and `React.memo`, resulting in measurably faster load times.
- Collaborated with backend engineers in an Agile/Scrum environment, participating in sprint planning, code reviews, and iterative feature delivery.

Python Full Stack Intern

Jul 2023 – Dec 2023

Aavid Software

- Contributed to full-stack application modules, developing clean user interfaces and integrating them seamlessly with Python-based backend APIs.
- Optimized data management workflows by writing structured CRUD operations and efficient database queries.
- Identified, diagnosed, and resolved functional bugs across frontend and backend modules, enhancing overall system reliability.

KEY PROJECTS

Pharma Inventory & Billing Management System - [Click here](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, Tailwind CSS

- Developed an end-to-end pharmaceutical ERP platform featuring automated inventory tracking, live billing generation, and stock analytics.
- Built and deployed an automated **medicine expiry alert and low-stock notification engine**, eliminating manual stock tracking efforts for pharmacy staff.
- Designed highly interactive admin dashboards with complex data grids, optimizing inventory CRUD workflows and reporting speed.

Inventory & Resource Management System

Tech Stack: React.js, REST APIs, JSON Web Tokens (JWT), Bootstrap

- Developed scalable CRUD modules with efficient React state management and seamless REST API integration.
- Implemented robust client-side form validation and centralized error handling to ensure data accuracy across all modules.
- Structured a modular, maintainable codebase to enhance scalability and reduce future development overhead.
- Diagnosed and resolved API failures and performance bottlenecks, improving application response times.

Visitor Management System

Tech Stack: React.js, Context API, Material UI, Camera API, Node.js

- Built a visitor registration system with real-time camera integration (Camera API) and backend connectivity for secure visitor logging.
- Integrated RESTful APIs and resolved UI rendering issues, significantly improving system usability and reliability.
- Optimized component-level performance through targeted debugging, enhancing the overall user experience.
- Delivered stable, production-ready features through cross-functional team collaboration.

EDUCATION

B.Tech in Computer Science and Engineering

Jul 2020 – May 2024

G H Raisoni Institute of Engineering and Business Management, Jalgaon | **CGPA: 8.9 / 10.0**

ADDITIONAL INFORMATION

- Active technical writer and independent developer with a focus on clean, scalable code architectures.
- Proficient with Git/GitHub branching strategies, code conflict resolution, and PR workflows.
- Comfortable working independently and in cross-functional team environments to deliver results under deadline pressure.
- Leetcode - Active problem solver focusing on Arrays, Hashing, and Two-Pointer algorithms using JavaScript and Python.
